Education: Diploma of dental technology

Education current: Software engineering

## **Character set**

- Organised
- Problem solver
- Team player
- Self-driven
- Schedule management
- Focused
- Dedication
- Observer

## **Work experience**

I have worked at a state-of-the-art dental laboratory in the Melbourne CBD

I am currently working in the Tullamarine Melbourne Airport for Dnata

## **Work experience elaboration**

As a dental technician, working in the Restorative Implant and Prosthetics Center dental lab, I sharpened my observatory and motor skills working under the microscope with delicate dental implant parts. I also got to learn how CAD and CAM have affected/revolutionised the dental industry and its treatments.

Working for Dnata, an airport service provider company directly owned by Emirates I have developed advanced team communication and leadership skills whilst working with simple yet efficient and secure software that the airport uses to accept, build, export/ import commercial freight on large scales.

## **Availability**

Monday - Friday.
